Types Of Project Management

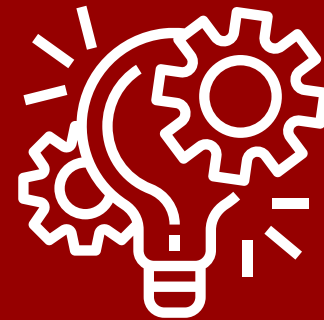

Agile Project Management

Agile Project Management is an iterative approach to managing projects, especially in software development. It emphasizes flexibility, collaboration, and customer satisfaction through continuous delivery and feedback.

Waterfall Project Management

Waterfall Project Management is a traditional project management methodology that follows a linear, sequential approach. In this method, each phase of the project must be completed before the next one begins, without any overlap.

Lean Project Management

Lean Project Management is a methodology that emphasizes delivering value to the customer by optimizing resources, reducing waste, and improving processes.

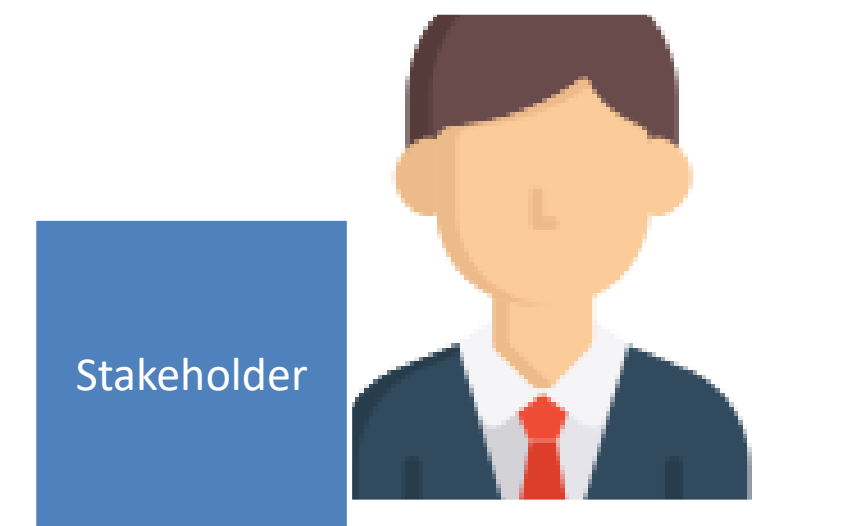

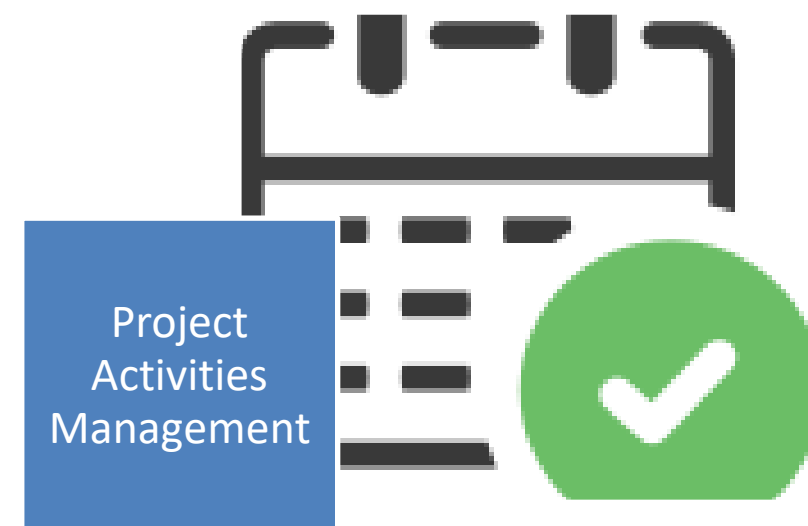

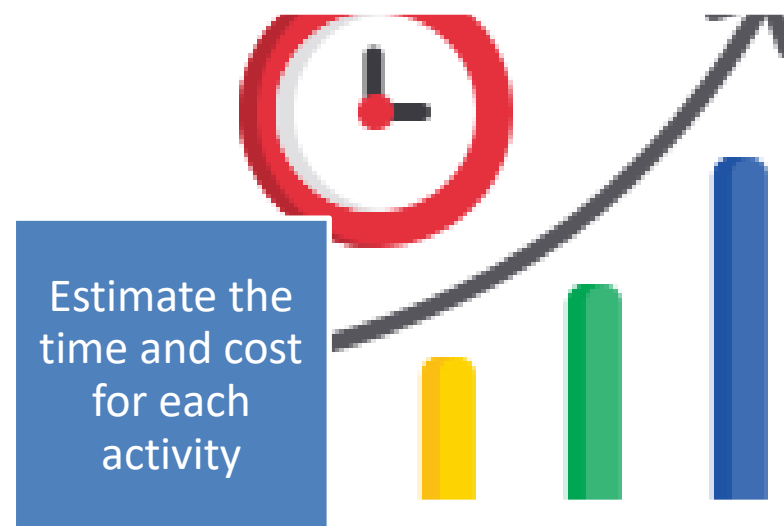

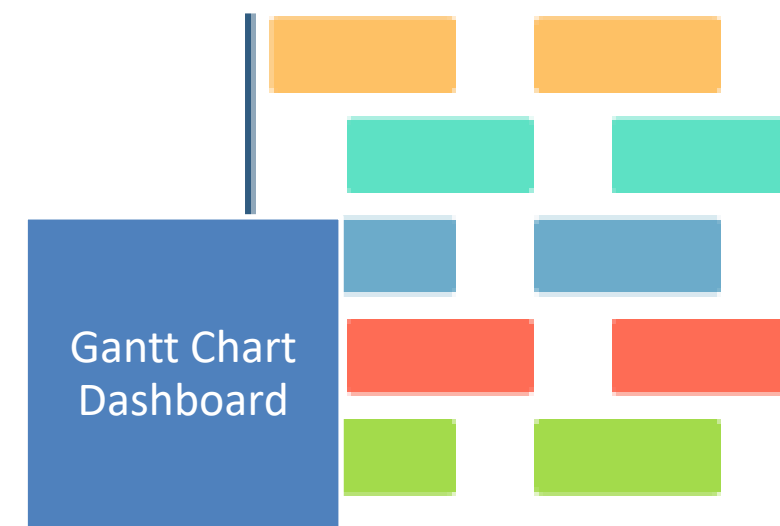

Critical Path Method

The Critical Path Method (CPM) is a project management technique used to identify the sequence of essential tasks that determine the minimum project completion time.
