1. Modern Systems for Software Development

1.1 Introduction

Modern Systems for Software Development is a dedicated software firm with a core focus on delivering software development, analysis, and implementation services that adhere to global standards. Our mission is to craft cutting-edge software solutions that meet the complex needs of our clients, ensuring quality and excellence in every project we undertake. By integrating international best practices into our processes, we strive to set a benchmark in the software industry.

Modern Systems for Software Development has innovated a healthcare software solution designed to streamline online services for medical professionals and pharmacies. This platform also serves as a vital tool for medical sales representatives. Crucially, it is engineered with the general public in mind, allowing them to engage with the system for their healthcare needs. Medical practitioners and pharmacists utilize this system to efficiently locate and serve patients, ensuring accurate and timely distribution of medications and services.

The platform is designed to provide a comprehensive suite of features, encompassing various medical fields such as internal medicine among others. Additionally, it will offer an extensive directory of over 189,000 commonly used medications, meticulously categorized by country for universal accessibility.

Visit Clinic provides a suite of general modules, including an accounting module with a comprehensive general ledger to track income and expenses for clinics and pharmacies. Additional modules are available within the system. To access detailed information, please proceed with registration.

Modern Systems for Software Development provides comprehensive software analysis services adhering to the highest standards for both private and public entities. Utilizing frameworks like the Information Technology Infrastructure Library (ITIL), which is renowned globally and tailored for IT services, they offer a suite of about twenty-six business processes. Additionally, ITIL offers a range of professional certifications catering to various expertise levels, from beginners to experts.

Modern Systems for Software Development provide comprehensive business analysis, aiding organizations in adopting processes aligned with global standards. Additionally, they offer specialized software solutions for processes like incident and knowledge management, enhancing operational efficiency and information governance.

The founder of Modern Systems for Software Development previously established a successful track record with notable entities such as Microsoft, Horvath, and Link Dot Net within a governmental framework.

The Capability Maturity Model Integration (CMMI) is a globally recognized standard that aims to enhance business processes, enabling organizations to conduct their operations more systematically. It encompasses approximately twenty-two distinct business processes. The proprietor of a company has been involved in a significant CMMI transformation initiative within governmental entities. To disseminate practical insights on CMMI application, this individual has authored and freely distributed an e-book, drawing from authentic implementation experiences, for the benefit of software engineers seeking to apply these principles in practical scenarios.

The founder of Modern Systems for Software Development holds a strong belief in the development of human resources, particularly in nurturing young talent. This commitment extends to providing expertise in software business process development and analysis, which contributes to the national economy in the IT sector. Their dedication led to the collaboration with a U.S. consultant in authoring a comprehensive book on CMMI, which they generously offer free of charge to the global community.

Custom software development, including portal creation, is tailored to meet the specific needs and objectives of clients, as guided by their recommendations and directives. Modern Systems for Software Development specializes in crafting bespoke software solutions that cater to the unique requirements of customers, ensuring accessibility through online platforms or internal networks.

Modern Systems for Software Development is committed to embracing diversity in IT specialization, ensuring that customer demands are met with professional services and products that adhere to international standards, all offered at competitive prices.

1.2 Why Modern Systems

Organization leaders strive to offer outstanding products and services that meet the needs and expectations of a global clientele. IT departments bear a crucial role in providing high-quality e-services that align with the organization's financial agreements and management expectations. It is essential to seek cost-effective solutions that support the organization's objectives and ensure sustainable operations.

Modern Systems for Software Development, based in Egypt, is dedicated to meeting the diverse software requirements of all users. With a strategic approach, Modern Systems for Software

Development offers vital support to various private and public entities, delivering high-quality, cost-effective in-house software solutions. Additionally, the company specializes in tailoring renowned global software to align with the unique needs and objectives of its clients.

Modern Systems for Software Development boast extensive expertise in business processes and the implementation of software solutions. They strategically utilize a selection of technologies in synergy to fulfill the specific needs of organizations. This approach ensures that each technology is leveraged effectively to enhance the organization's operational efficiency and achieve its strategic objectives.

Modern Systems for Software Development are committed to fostering human welfare, particularly for the youth, to accomplish strategic objectives aimed at ensuring a high quality of life for all. This commitment is mirrored in the services offered to both local and global markets, reflecting a dedication to excellence and a better future through technological advancement.

Modern Systems for Software Development specializes in delivering bespoke software solutions, including proprietary platforms such as VisitClinic.org. We cater to the unique requirements and expectations of our clients, whether it involves developing custom software from scratch or tailoring existing products like Microsoft SharePoint to meet specific business needs. Our commitment is to ensure that our software aligns perfectly with the client's vision and operational demands.

Modern Systems for Software Development are equipped to deliver solutions that adhere to a variety of global standards, including the Information Technology Infrastructure Library (ITIL), Customer Relationship Management (CRM), and the Capability Maturity Model Integration (CMMI). These systems are designed with the flexibility to be customized and configured to meet the specific needs of different international standards.

Modern Systems for Software Development is committed to delivering comprehensive support through our team of expert consultants. We specialize in analyzing and developing software solutions that are tailored to meet our customers' expectations and align with their strategic organizational goals. Our approach ensures that the software we configure is not only functional but also a strategic asset to our clients' operations.

1.3 Modern Systems Services

Modern Systems for Software Development, a dedicated entity within the IT sector, is committed to refining business processes and bolstering visibility for both internal staff and external clientele, aligning with the company's strategic goals. Our proficiency lies in ongoing process enhancement, a key aspect of our services designed to foster organizational growth.

Modern Systems for Software Development are designed to enhance service delivery, both online and offline, by tackling the challenges faced by internal and external customers. These systems strive to foster innovation, providing tailored solutions that assist all stakeholders in reaching their objectives efficiently. By leveraging modern methodologies and technologies, they offer a robust framework for businesses to improve customer satisfaction and operational excellence.

Modern Systems for Software Development boasts a wealth of experience across various software domains. Recognized globally, the following frameworks are among the most widely adopted by organizations, and Modern Systems for Software Development is well-equipped to assist any organization by offering comprehensive software solutions and thorough process analysis. Their expertise ensures that clients receive tailored, cutting-edge software strategies that align with industry best practices.

1.4 Visit Clinic 1# Medical Society

Visit Clinic offers an integrated platform designed for healthcare professionals, including doctors, pharmacists, and laboratory technicians, medical factories, computer stores, medical factories, schools, educational institutions; faculties; and universities, as well as sales representatives and individual clients. This comprehensive system facilitates seamless collaboration across various medical services, ensuring a more cohesive healthcare experience. By uniting diverse roles within a single interface, Visit Clinic streamlines the delivery of medical care and support.

Visit Clinic offers a user-friendly platform with a vast array of features suitable for various needs. It is equipped with numerous functionalities that cater to diverse preferences, ensuring that you can easily find what you're searching for. The dedicated team of consultants continuously updates the website, striving to meet and exceed user expectations with every enhancement.

1.5 Visit Clinic dashboard

Explore visit clinic's portal to discover the outstanding services we offer. The accompanying graph illustrates the success story of our portal, showcasing the effectiveness and reach of our services through compelling numerical data. This visual representation serves as a testament to our commitment to excellence and the measurable impact we have on our community's health outcomes.

1.6 Visit Clinic Youtube Video

Modern Systems for Software Development's Visit Clinic would like to draw your attention to our video content. Please be aware that due to ongoing updates to our portal, this content may no longer be current. We encourage you to log in to the system or download the most recent documentation directly from the portal to ensure you have access to the latest information. Thank you for staying updated with us.

1.7 Microsoft Copilot

Microsoft Copilot is an AI-powered assistant designed to enhance your productivity and simplify various tasks. Integrated within Microsoft 365 applications like Word, Excel, Outlook, and PowerPoint, Copilot helps users by:

- **Generating Content:** It can create text, generate summaries, and offer suggestions to improve writing.
- **Answering Questions:** It provides accurate and relevant information, helping you find answers quickly.
- **Performing Tasks:** It can automate repetitive tasks, freeing up your time for more important activities.
- **Providing Insights:** It analyzes data and provides insights, making it easier to understand and utilize information effectively.
- **Creative Projects:** It assists in brainstorming ideas and generating creative content.

With Copilot, you have a powerful tool at your disposal to enhance productivity and streamline your workflow.

Microsoft Copilot offers several plans to cater to different needs:

1. **Standard Copilot:** This is the free version that provides access to basic AI features, such as generating and editing AI images, and using GPT-4 during non-peak hours. It's available on the web, Windows, macOS, iPadOS, and mobile apps¹.
2. **Copilot Pro:** For \$20 per month, this plan offers priority access to GPT-4 and GPT-4 Turbo during peak usage times, 100 boosts per day for creating AI images, and access to Copilot in the free web versions of Word, Excel, OneNote, and Outlook.
3. **Copilot for Microsoft 365:** Priced at \$30 per month, this plan integrates seamlessly with Microsoft 365 apps (Teams, Word, Outlook, PowerPoint, Excel, etc.) and includes enterprise-grade security, privacy, and compliance.

4. **Copilot Studio:** This is a low-code, end-to-end conversational AI platform that allows you to build and customize your own Copilots.

Each plan offers different features and benefits, so you can choose the one that best fits your needs. Would you like more details on any specific plan?

How to register and activate your Hotmail account for Microsoft Copilot for free, follow these steps:

1. **Create a Microsoft Account:** If you don't already have a Microsoft account, sign up using your Hotmail email address. Visit the Microsoft account creation page and follow the instructions to create your account¹.
2. **Access Free Microsoft 365 Apps:** Once your account is created, you can access the free online versions of Microsoft 365 apps like Word, Excel, Outlook, and PowerPoint. These apps are available for free with a Microsoft account¹.
3. **Enable Copilot:** To enable Copilot in the free version, you may need to check for updates in the Microsoft 365 apps and ensure that Copilot features are turned on. You can usually find this in the settings or options menu of each app.
4. **Check for Updates:** Make sure your Microsoft 365 apps are up to date, as Copilot features may be included in recent updates.
5. **Use Copilot:** Once enabled, you can start using Copilot to assist you with various tasks in the Microsoft 365 apps.

Microsoft Official Copilot Website <https://copilot.microsoft.com/>

1.8 Portal Response Challenge

The Visit Clinic portal offers user-friendly functionalities and straightforward development strategies to address potential issues arising from ambiguous software development challenges, ensuring a consistently fast response. However, low portal response times could be attributed to one of the following reasons:

- 1- Check your internet connection speed using well-known portals such as Speedtest <https://www.speedtest.net/>
- 2- Ensure your internet bundle is active. If necessary, restart the internet router or contact your internet provider for technical support.
- 3- Open the portal and allow it to fully load. This helps your browser download cache files, ensuring it is ready and faster for future visits.
- 4- You can download widely-used internet browsers:
 - a. Microsoft Edge <https://www.microsoft.com/en-us/edge/?form=MA13FJ>
 - b. Google Chrome <https://www.google.com/chrome/>
- 5- If you encounter any new issues, please don't hesitate to contact us by email, including a screenshot for reference.

1.9 Portal Migration

The Visit Clinic portal has been migrated from www.visitclinic.org to the current portal www.visitclinic.net, following the strategic directions and recommendations of Modern Systems for Software Development. The portal's Facebook and LinkedIn pages remain unchanged.

If you need any assistance or guidance, please feel free to contact the company through the approved communication channels listed at the end of this document

2. Doctor

A physician is a medical professional who is adept at diagnosing and treating people afflicted with various health conditions. This role encompasses individuals who have attained the requisite qualifications and possess a valid medical license, which may include dentists and surgeons. Physicians are tasked with prescribing medications as part of their treatment plans, following a thorough medical assessment of the patient.

The vocation of a physician involves a commitment to the health care of individuals who are injured or ill, which entails the prescription of standard treatments like pharmaceuticals, the provision of fundamental health care, or the pursuit of expertise in a particular medical specialty, such as pediatrics, neurology, psychiatry, ophthalmology, or anesthesiology.

To practice medicine, a physician must adhere to a set of ethical standards that guide their professional conduct. These include wisdom, characterized by the physician's judicious use of language and decision-making; patience, which involves enduring all patient interactions with fortitude; and kindness, which is the compassionate and gentle manner in which a physician engages with all patients. These principles are integral to the medical profession, ensuring that the care provided is not only effective but also empathetic and respectful.

The physician dashboard on the portal provides a comprehensive look at offered services and provides quick links to important functionalities.

Physician Management - Medical Professional Interface

2.2 Medication Management Settings

The Visit Clinic website offers a streamlined process for doctors to prepare prescriptions. With user-friendly features, a physician can effortlessly input the prescription's starting and ending addresses, as well as specify the number of days a patient is eligible for a follow-up visit post-examination. This intuitive system simplifies the prescription preparation, ensuring that healthcare providers can focus on patient care with enhanced efficiency.

Please visit the following address in order to find the form

https://visitclinic.net/Prescription_Configurations.aspx

The form will display the following information in order to customize your prescription

- **Apply Templates:** Quickly populate prescription fields with pre-configured English and Arabic information.
- **Max Days:** This populates basic physician, patient visit, and follow-up day information.
- **English Header:** Complete the English prescription header by adding the required information.
- **English Footer:** Provide the necessary data for the English prescription footer.
- **Arabic Header:** Add required information to the Arabic prescription header.
- **Arabic Footer:** Provide the necessary data for the English prescription footer.

2.3 Quick Visit clinic

Visit Clinic's platform offers a comprehensive feature that enables doctors to document patient visits efficiently. This feature encompasses the recording of essential general information, including the patient's height and weight. Additionally, it allows for the inclusion of specific requirements for each patient, such as the need for x-rays or laboratory tests. Furthermore, physicians have the capability to prescribe medications directly through the system. The generated prescriptions are printable and include vital details such as the doctor's name and address, along with the patient's personal information and the prescribed medications. This streamlined process ensures that all pertinent data is accurately captured and readily accessible for both the doctor and patient.

- **Steps 1:** You can search for a patient by their mobile number, email address, or via their contactless RFID card.

2.4 Advanced visit to the clinic

Visit Clinic streamlines the process of scheduling medical appointments by enabling doctors to add visits for registered users found via phone number lookup. There are two categories of visits available: a standard visit and an advanced visit. The advanced visit offers enhanced benefits, furnishing the physician with comprehensive patient data, including medical history, current health challenges, allergies, and results from clinical examinations, lab tests, and imaging studies like X-rays. Furthermore, it allows the doctor to generate and print detailed prescriptions and instructions for the patient, which may be required by other medical service providers, such as radiology or diagnostic laboratories.

- **Step1:** You can search for a patient by their mobile number, email address, or via their contactless RFID card.

- **Step 4:** Advanced Patient Requirments Selection

The portal will provide the following consultations selections

- **Patient History:** This feature allows the user to view the patient's medical history, including information related to smoking.
- **Patient Problems:** Anemia is listed as a patient problem. A complete problem list is available for review.
- **Allergy:** The patient's record indicates potential allergies to various substances, for example, ACE inhibitors.
- **Physical examinations:** This area allows for the documentation of physical examinations, including those of bones and joints, with further examination options provided in the physician's examination module
- **Laboratory Test:** The portal will offer access to a variety of laboratory tests, including complete blood counts (CBC).
- **Medical Imaging:** X-ray is one of the common medical imaging procedures available for selection within the system.

The patient's temperature is C The patient's heart rate pulse is
The doctor's notes are
The proposed date for the patient's next visit is 2025-04-10
The doctor prescribed the following medications: The medication prescribed is PANADOL SOLUBLE 500MG TAB
The medication prescribed is Vitamax soft gelatin capsules

What are the recommended actions for the patient's case based on the provided information?

Prepare CoPilot Text

Copy Text

Open Copilot

For physician use, the system offers options to copy text to the clipboard and to access Microsoft Copilot for AI-generated medical information. This feature is intended to provide support, but it does not replace the physician's role or clinical decisions.

copilot.microsoft.com/chats/bJq5eaTLA25iFP4fpWUtJ

for the patient's case based on the provided information?

It seems that some crucial details like the patient's height, weight, temperature, and heart rate are missing, and the doctor's notes don't provide specific observations or diagnoses. Recommendations would be better tailored if I had complete information. Based on the provided medications, here's a general approach:

- Medication Adherence:** Ensure the patient understands the purpose of the medications prescribed:
 - Panadol Soluble 500 mg:** Likely prescribed for pain relief or fever reduction.
 - Vitamax capsules:** These may be a supplement to address nutritional deficiencies or overall health improvement.
- Follow-Up Visit:** Ensure the patient attends the next scheduled appointment on **April 10, 2025**, for further assessment.
- General Health Monitoring:**
 - Track the patient's vital signs (temperature, pulse rate, etc.) regularly.
 - Encourage the patient to report any new or worsening symptoms promptly.
- Lifestyle Recommendations:** If the patient is generally healthy, these can be helpful:
 - Balanced diet rich in vegetables, fruits, and lean proteins.
 - Regular physical activity suited to their abilities.
 - Adequate hydration and sleep.

If you'd like to add more details or discuss further observations, feel free to share!

2.5 Customize Clinical Examination Form

The Visit Clinic portal offers an exceptional feature that allows doctors from any specialization to customize their clinical examination forms to meet their specific expectations and needs. The portal provides an easy-to-follow process for customizing these forms, ensuring user-friendly navigation. Once customized, the form can be linked to the clinical examination process. Doctors can link and reconfigure the form as needed to accommodate new requirements or enhancements. These customized forms are visible only to the doctor, ensuring privacy.

The Visit Clinic portal offers the following forms for clinical examinations:

2.5.1 Create a novel template

The Visit Clinic portal enables doctors to customize innovative clinical examination forms. It provides essential tools to easily tailor these forms, helping doctors deliver exceptional patient care. The customization options include:

- 1- Text boxes for entering values
- 2- Labels for displaying information
- 3- Dropdown menus for selecting values like city or country
- 4- Hyperlinks for external website links
- 5- Images to visually represent situations (ensure small sizes for optimal display)

The portal offers a preview feature to review customizations before finalizing. Once published, forms cannot be edited to maintain data integrity. If changes are needed, a new form must be created by the doctor or an experienced support engineer.

- **Step 1:** The system supports physician-defined custom examination forms, enabling the addition of custom fields for extended functionality.

Please be aware that after publishing the form, you will no longer be able to alter its content, as users may have already submitted data. However, you have the option to set the form's status to private, which will prevent further visibility to users.

Please ensure you take your time in designing the form and obtain your organization's approval before publishing it.

The modern systems for software development is not responsible for the content of your forms.

Kindly ensure compliance with both international and national laws.

Captcha **4195**

2.5.2 Configuration of request forms

The Visit Clinic portal offers a linking form that enables doctors to customize the necessary forms for clinical examination assessments. Both doctors and professional support engineers can link these customized forms to the clinic examination form, ensuring that the newly added forms are directly integrated into the doctor's account for seamless use.

- **Step 1:** Choose the appropriate customized examination form. The system will indicate whether the form has been published, helping you make the right selection.

2.6 New Visit for Customized Doctor Request Form

The Visit Clinic portal offers a third form for clinical examinations, enabling doctors to utilize customized forms. Whether newly created or previously existing, these forms can be selected and integrated into the portal. The customized forms are considered advanced, providing additional features to help doctors deliver exceptional consulting services to patients.

- **Step1:** You can search for a patient by their mobile number, email address, or via their contactless RFID card.

Doctor - Visit

Clinic

Clinic Name

Dr Mahmoud Clinic

Find account

Mobile

01208911848

Find

Please note that search will display first match only

- **Steps 2:** The portal will show the patient's data, along with a button or link to begin a new visit record.

Doctor - Visit

- **Step 4:** Custom Form: When a customized examination form is selected, it will automatically be incorporated into the physician's examination form, allowing for the inclusion of supplementary details.

Custom Form	
Form Name	
Evaluation Type	eye
Patient Name	Please enter Patient Name?
Patient Age	Please enter Patient Age?
Marital Status	engaged
Which Eye	left
Right Eye Evaluation	Please enter Right Eye Evaluation?
Left Eye Evaluation	Please enter Left Eye Evaluation?

- **Step 5:** Advanced Patient Requirments Selection

The portal will provide the following consultations selections

- **Patient History:** This feature allows the user to view the patient's medical history, including information related to smoking.
- **Patient Problems:** Anemia is listed as a patient problem. A complete problem list is available for review.
- **Allergy:** The patient's record indicates potential allergies to various substances, for example, ACE inhibitors.
- **Physical examinations:** This area allows for the documentation of physical examinations, including those of bones and joints, with further examination options provided in the physician's examination module
- **Laboratory Test:** The portal will offer access to a variety of laboratory tests, including complete blood counts (CBC).
- **Medical Imaging:** X-ray is one of the common medical imaging procedures available for selection within the system.

Advanced Patient Requirements Selection

Quick list: Laboratory Tests | CBC | Red Blood Cell Count/Erythrocyte Count

Doctor comment: check CBC

add

Type	Required Action	Doctor Comment	
Laboratory Tests	CBC Red Blood Cell Count/Erythrocyte Count	check CBC	Delete

- **Step 6:** Physicians can add medications to prescriptions from a pre-populated list, and easily specify route, dosage, duration, and repeat frequency.

Prescription / Remedy

Medicine name: PANADOL

Quick Med Lib: PANADOL

Frequency: Daily

Route: By Mouth (orally)

Dosage A: After breakfast | Dosage B: With water

Notes: Enter Medicine Notes

Duration: 1 days | Unit: Day(S)

Repeat after finish: ☒ No ☐ Yes

add

Medicine	Unit	Repeat	Route	Frequency	Dosage A	Dosage B	Duration	Doctor Comment	
PANADOL	Day(S)	No	By Mouth (orally)	Daily	After breakfast	With water	1 Day(S)		Delete

Save

- **Step 7:** The portal includes a 'Save' function for patient visits and offers two printing options: 'Print All,' which includes physician laboratory requirements, and 'Print Prescription Only.'

Save

Print All

Print

Print All: Select this option to print both the prescription and the patient's required laboratory results.

- **Step 8:** The Copilot assistance feature enables physicians to collect necessary patient information and transmit it to Microsoft Copilot for medical insights. This AI-driven tool is designed to provide guidance and support to physicians, but it does not replace their professional role or clinical decisions.

For physician use, the system offers options to copy text to the clipboard and to access Microsoft Copilot for AI-generated medical information. This feature is intended to provide support, but it does not replace the physician's role or clinical decisions.

2.7 Scheduling Setup Options

The Visit Clinic website offers a streamlined feature enabling doctors to directly access and print patient prescriptions. This functionality allows for the retrieval of prescriptions without the need to open each patient's detailed visit record. Additionally, it affords the convenience of printing prescriptions that include all necessary patient data, ensuring that the doctor can efficiently manage patient visits and their associated medical documentation.

The scheduling form enables physicians to designate clinic locations and visit times. This schedule is then accessible on the patient portal, providing patients with visibility into available appointment slots.

2.8 Appointment Scheduling for Patients

The visit clinic's online appointment scheduling system offers a convenient platform for patients to secure their visit times at healthcare facilities via the internet. This innovative service streamlines the patient intake process, effectively minimizing wait times and overcrowding. Through the 'Visit Clinic' portal, physicians receive real-time updates on daily bookings, enabling them to verify and prepare for upcoming consultations. Patients, in turn, are empowered to monitor the progress of their appointment requests, with clear indications of confirmation, denial, or pending status, ensuring transparency and communication in the healthcare experience.

Doctor

- Review patient bookings
- The possibility of a quick visit or a specialized visit
- Accept the visit

Patient - Website User

- See acceptable visits from doctors

Physicians can review today's appointment schedule. For each appointment, they can confirm, start a quick visit, or schedule an advanced visit using the provided options.

2.9 Roster of Individuals Under Medical Care

The visit clinic's portal features a comprehensive patient list, serving as an essential tool for

healthcare professionals to efficiently manage and monitor patient information. This dynamic list is equipped with a suite of functionalities designed to streamline clinic operations. Furthermore, the Visit Clinic function enhances this utility by enabling the display of the patient roster directly on the website, facilitating better accessibility and coordination in

patient care.

The clinician consultation roster provides a list of physician patients, enabling quick review of previous visits. An 'Edit' link, which changes based on the visit type, allows for visit modification. A 'Remedy' link provides access to an external form for viewing prescribed medications.

2.10 Tracking Patient Clinic and Laboratory Appointments

The Visit Clinic Portal is designed to offer exceptional service, enabling doctors to access records of the most recent visits to the clinic and laboratory. This ensures that the patient's previous attendance at both the clinic and laboratory is verified, allowing for the provision of necessary consultations.

The portal provides physicians with access to the most recent physician and laboratory visit details, facilitating a comprehensive view of patient medical visits. A general information overview is presented in the image below.

2.11 Complete patient medical records

The comprehensive patient medical records service is expertly crafted to assist physicians in accessing up-to-date medical records. This service enables doctors to review a patient's most recent consultations and the prescribed medications for each visit. Additionally, it furnishes a detailed record of the patient's latest laboratory visits, offering physicians a holistic view that is essential for informed decision-making during consultations. This integration of information streamlines the diagnostic process, ensuring that healthcare providers have all the necessary data at their fingertips for optimal patient care.

2.12 Pre-Visit Clinic Launch

The visit clinic portal offers enhanced forms that enable doctors to access pre-portal launch information based on data submitted by users. This system allows patients to provide accurate information with approvals from their doctors and laboratories, ensuring that all necessary details are available for medical assessment.

By utilizing these forms, healthcare providers can obtain a comprehensive view of patient information, even when traditional paper records are unavailable or located in different countries. This process ensures a secure, fast, and convenient method for accessing essential data. Consequently, doctors can proactively provide required medications and assessments without repeatedly requesting potentially missing information, improving overall patient care and efficiency.

2.14 Today's appointment and follow-up

Accessing the clinic portal allows the doctor to view only today's appointments, facilitating the initiation of the examination process. This streamlined approach ensures that the physician can focus on the immediate schedule, optimizing the workflow and enhancing patient care efficiency. By limiting the display to current appointments, the system supports doctors in maintaining a clear and organized overview of their day, enabling them to prepare for each consultation with the necessary information and focus.

Today's schedule includes the appointment and subsequent follow-up.

2.16 Medical Professional's Vacation Planning

The portal is designed to assist medical professionals in organizing their vacation schedules, whether to take advantage of the summer break or for other personal reasons. It streamlines the process for doctors to plan their time off without impacting patient care. However, it is important to note that this system does not extend the functionality for patients to book appointments during this period. The focus remains on ensuring that healthcare providers can manage their well-deserved breaks efficiently.

3. Clinic

A clinic is a vital healthcare facility where medical professionals, including doctors and their teams, provide care to patients. Operating either as standalone entities or as part of a larger hospital, these centers are staffed with dedicated nurses who assist doctors in their medical responsibilities. Clinics play a crucial role in offering preventive care to promote overall health, as well as treating those who are unwell. They are often the first point of contact for individuals seeking advice on a range of non-emergency or immediate health concerns encountered in daily life.

3.4 Incorporate a new patient medical insurance card information

The Visit Clinic portal is set to introduce a remarkable functionality that will allow the clinic's reception staff to seamlessly integrate new patients' medical insurance card details into the system. This enhancement is designed to streamline the administrative process, ensuring that the entry of insurance information is both efficient and error-free, thereby improving the overall patient registration experience. With this new feature, the clinic can ensure that all patient data is accurately recorded and easily accessible, which is essential for effective patient care management.

3.6 Organizations Service Directory

The Organization Service Directory is a cutting-edge platform designed to assist medical institutions in offering their services to the public. Its primary function is to streamline the process by which healthcare providers can list their services, enabling patients to easily access and request the medical assistance they need. This directory serves as a bridge between medical organizations and the community, ensuring that essential healthcare services are readily available and conveniently accessible to those who require them. By simplifying the interaction between providers and users, the Organization Service Directory enhances the efficiency of healthcare delivery and supports the overall well-being of the public.

3.8 Incorporate an additional room

Incorporating an additional room into a clinic's infrastructure could be an integral feature of a medical clinic management system. This system, an amalgamation of sophisticated technological tools, is designed to streamline the clinic's routine functions. It enhances efficiency by automating various tasks including patient records management, scheduling of appointments, coordination of physician timetables, handling of prescriptions, and processing of payments, transactions, and billing.

The integration of a new room can signify the clinic's growth or its commitment to accommodating more patients. Such an expansion must adhere to the prevailing health regulations and legal requirements. Detailed information on compliance can be obtained from local health authorities or through consultation with a healthcare management specialist.

For larger medical facilities capable of conducting surgical procedures, the option to add a room is particularly beneficial. It allows for the allocation of dedicated spaces for surgeries, post-operative care, recovery, and patient examinations. The 'Visit Clinic' feature streamlines this process by providing a systematic approach to managing these new spaces. These rooms can be customized with medical equipment or comfort-enhancing amenities like artwork, ceiling fans, or televisions, ensuring a functional yet patient-friendly environment.

Conduct a search for a clinical consultation room.

3.9 Locating a clinic room

In the clinic's system, you have the capability to locate a room that has been previously registered and access its details for any necessary updates or changes. This feature ensures that room information remains current and accurate, reflecting any new modifications or adjustments made over time. It's a convenient way to manage clinic resources efficiently, ensuring that all data is up-to-date and easily accessible for staff and administration .

3.12 Admission Configurations

Visit Clinic offers a customizable scheduling system for patient rooms in medical clinics, allowing for the arrangement of visitation times by friends and relatives. This system also coordinates the access of healthcare professionals, such as the attending physician, nurses, and support staff, ensuring their visits align with the clinic's operational plans. Additionally, it facilitates the scheduling of medical appointments and treatments, like the administration of medication, by enabling doctors and nurses to set specific times for patient care activities. This integrated approach streamlines the visitation and treatment processes, enhancing the overall efficiency of clinic management.

3.16 Locating Patient Record for Admission

There are essential procedures to follow when preparing for surgery, beginning with a thorough clinical assessment. This step involves gathering comprehensive details about the patient's medical history, including any previous medical conditions, surgeries, and current medications. Depending on the specific circumstances and the type of surgery planned, a series of laboratory and imaging tests may be necessary. For patients on long-term medication for chronic conditions, it's crucial to evaluate and possibly modify their medication regimen pre- and post-surgery. The process of scheduling the surgery is streamlined through an online booking system, accessible via the clinic's website, managed by healthcare professionals or the attending physician. The Visit Clinic system offers the convenience of arranging surgical appointments or ongoing health evaluations. The booking process initiates with the receptionist documenting the patient's fundamental details, such as contact information and emergency contacts, along with insurance details. Once this information is entered, the patient's file is prepared and forwarded to the designated physician for review and further action. This systematic approach ensures that all necessary information is accurately recorded and communicated, facilitating a smooth and efficient pathway to surgical care.

3.17 Patient Admission: Physician Selection Segment

The Visit Clinic website streamlines the process of securing a room by enabling direct bookings through the reception desk. Upon the patient's data registration completion, their file is seamlessly transferred to the attending physician. This allows the doctor to input additional critical information necessary for comprehensive patient care. Physicians have the capability to locate a registered patient's file to conduct a thorough review and append essential details pertinent to the reservation. This includes conducting an analysis of the patient's medical condition through a structured questionnaire, outlining any necessary procedures such as radiological exams or laboratory tests, selecting the appropriate surgical intervention along with its associated costs, and detailing medication protocols before and after surgery, including any drugs discontinued two weeks prior or those known to cause allergic reactions. Additionally, the website furnishes a suite of reports encompassing patient history, reservation logs, financial summaries, clinic dispatches, and operational analytics.

3.18 Patient Admission Bill - Invoice

The Visit Clinic portal offers the convenient feature of generating a patient's appointment invoice directly within the clinic or pharmacy. This service complements the existing patient care by including registered services and medications on the invoice. Furthermore, any pharmaceuticals prescribed by the doctor are seamlessly integrated into the billing system. Personnel such as receptionists, medical staff, or financial administrators are empowered to input additional billing details, facilitating the printing process. This system streamlines administrative tasks, ensuring a more efficient patient experience.

3.19 Patient Discharge

The process of discharging a patient from a medical facility is comprehensive and designed to maintain safety and ongoing health care post-hospitalization. This multi-step service encompasses the following elements: A discharge evaluation to formulate and communicate the patient's ongoing treatment strategy, including any necessary details for discharge or transfer. Provision of medications, ensuring that any prescriptions needed post-discharge are provided to the patient. In the case of medical devices being required at home, it is imperative that the patient is instructed on the setup and usage of the equipment. Coordination of transportation is also a critical step, where the patient is encouraged to secure a pickup by a family member or friend, or otherwise, the facility staff must be notified to arrange alternative transport solutions. Lastly, it is essential to verify that the patient departs with all necessary items to facilitate a smooth recovery. Visit Clinic offers this discharge service to ensure all administrative tasks are concluded and the patient's file is properly closed.

3.20 Equipment Catalog

The Medical Device Catalog Service, offered by our website, presents a comprehensive directory of medical devices. This catalog encompasses a diverse array of devices, meticulously detailing each product's brand, category, user ratings, and manufacturing entity. It serves as an invaluable resource for doctors and healthcare practitioners, enabling them to make informed decisions when selecting the most suitable devices for their medical requirements.

Additionally, Visit Clinic is a feature that furnishes insights into a spectrum of medical devices commonly utilized in clinical settings, accessible for review by physicians. This service ensures that healthcare professionals are equipped with the necessary knowledge to enhance patient care through the optimal use of medical technology.

3.21 Employee Vacation, Sick Time, and Leave Request Information

The leave management system is an integral tool that facilitates various types of leave applications for employees within organizations and corporations. It encompasses a range of leave categories, including but not limited to annual, sick, and administrative leave. Typically, leave applications are processed via a digital platform, enabling supervisors and human resources personnel to evaluate and sanction these requests efficiently. This mechanism plays a crucial role in monitoring the work schedules and holiday entitlements of staff members, thereby ensuring the equitable enforcement of the company's leave policies.

Furthermore, the Visit Clinic website offers a streamlined process for employees to lodge their leave applications online. This feature allows medical professionals to oversee their team's leave schedules and authorize absences accordingly. The system's design is such that it simplifies the leave application process, promotes transparency in leave allocations, and assists in maintaining a balanced workflow within the healthcare facility.

3.29 Transportation Plan Management

The Visit Clinic Portal offers a comprehensive transportation plan tailored for businesses, streamlining the process of vehicle and logistics management. This plan is designed to simplify the integration of new vehicles and facilitate the seamless delivery of goods from one location to another. The portal boasts an extensive database, featuring over 3,300 car models and partnerships with more than 390 automobile manufacturers, providing a wide array of options to meet diverse transportation needs. This robust platform ensures that companies have access to a vast selection of vehicles, enabling them to find the perfect match for their specific requirements.

New Car 	The Visit Clinic portal offers a robust feature that allows companies to seamlessly integrate new vehicles into their fleet. This system is designed with a comprehensive selection criteria, accommodating various vehicle types including sedans and vans. It also incorporates a range of specifications such as the manufacturer's name, car model, color, license number, and the expiration date of the license. Additionally, it facilitates the recording of details pertaining to the rental company and the assigned driver's name, ensuring a holistic approach to fleet management.
Car Directory 	The Visit Clinic portal offers a valuable feature for the Car Directory, allowing users to peruse the company's listed vehicles with the aim of updating the submitted information. This functionality enhances the user experience by streamlining the process of managing car listings and ensuring that all details are current and accurate. It's an essential tool for maintaining the integrity of the Car Directory's database.
New Delivery 	The Visit Clinic Portal introduces an innovative feature called 'New Delivery' to the company's suite of services. This feature is designed to streamline the process of transporting people and goods from one location to another along predetermined routes. It offers a systematic and efficient approach to logistics, ensuring that deliveries are conducted smoothly and with precision. By optimizing route planning, 'New Delivery' enhances the company's operational capabilities, providing a reliable solution for the movement of items and individuals as required. This addition is a testament to the company's commitment to continuous improvement and customer satisfaction.

**Delivery
Directory**

The Visit Clinic portal offers a valuable feature for car delivery services, allowing users to access the Delivery Directory. This directory enables users to review and manage the car delivery orders they have placed, providing an efficient means to update or alter the submitted information as needed.

3.30 Meals Management

The Visit Clinic portal offers a comprehensive Meal Management system that assists clinics in creating appropriate dietary plans for patients. These plans are meticulously crafted, taking into account internationally recognized nutritional information, to ensure that medical professionals can thoroughly evaluate and determine the most beneficial food choices for their patients' recovery. By integrating such a system, the portal facilitates a more informed and effective approach to patient care, emphasizing the importance of tailored nutrition in the healing process.

Introducing a New Dish / Meal 	The Visit Clinic portal now offers a new feature within the Meals Management system, allowing for the introduction of new dishes or meals. This enhancement is designed to facilitate the addition of nutritional options for both patients and clinic staff, ensuring a diverse and health-conscious menu. Whether it's for patients with specific dietary needs or for employees seeking a wholesome meal during their workday, this update aims to streamline the process of meal planning and implementation within the clinic's food service operations.
Corporate Dining Options 	The Visit Clinic portal offers a comprehensive Corporate Dining Options module within its Meals Management system. This feature is designed to present a curated list of meal options to clinic employees, functioning as an interactive directory. Employees can conveniently browse through the selection and have the ability to edit and personalize the information according to their dietary preferences or restrictions. This streamlined approach ensures that all staff have access to healthy and varied dining choices, enhancing their overall wellbeing and satisfaction.
Include a new patient meal option 	The Visit Clinic portal has been updated to include a new feature within the Meals Management system. This enhancement allows for the provision of specialized meals to individual patients, tailored according to the specific dietary recommendations prescribed by their doctors. This personalized approach ensures that each patient receives the nutrition they need, in alignment with their health requirements and medical advice. It's a significant step forward in patient care, offering a more integrated and considerate service within the clinic's offerings.

Patient Meal List

The Visit Clinic portal offers a comprehensive Patient Meal List to the Meals Management team, enabling them to access and manage the assortment of meals available to patients. This streamlined process ensures that the dietary needs and preferences of patients are meticulously catered to, with a focus on nutrition and variety. By facilitating this crucial aspect of patient care, the portal aids in the efficient delivery of meal services within the healthcare facility.
